Alerting Abstract JP A

NOVELTY - Thermosetting composition comprising:

1. an epoxy-containing material;

2. a curing agent; and

3. a filler.

(A) contains an epoxylated thermoplastic resin containing a low moisture-absorbing material.

USE - Used in sealing goods and structures, specifically for car and truck, e.g., a roof ditch.

ADVANTAGE - Product sealing excels in heat resistance and durability. It keeps bonding with a discontinuous part while maintaining the appearance of the coated surface.
